SUSTAIN ABLITY

WE ASSUME RESPONSIBILITY

For us, corporate success is inextricably linked to social and sustainable responsibility. We are committed to helping shape the social environment and fostering sustainable progress. Low consumption of natural resources is a matter of course for us.

UTZ

UTZ is a programme and label that represents sustainable coffee, cocoa, hazelnut, and tea cultivation. The programme contributes to a better treatment of farmers, workers and their families, and the environment.

Fairtrade – The certification for fair trade

The Fairtrade certification stands for fairly cultivated and traded products. Small farmers are offered stable prices as well as long-term trade relations. Furthermore, the standards include criteria on democratic organisational structures, environmental protection, and safe working conditions.

COMPOSTABLE FOIL

Compostable foil

We use foils that are made of biodegradable materials and are compostable. These products can be identified by this logo.

ClimatePartner.com/13255-1904-1001

CO₂-reduced production

Our advent calendars and catalogues are produced 100 % climate-neutral and support a climate-protection project in South-East Zambia.

Plastic 100 % recyclable

The deep-drawn components used in our advent calendar are made from 100 % recyclable plastic.

Tins are 98 % recyclable Our Christmas Tin and Premium Box are made of tin plate and are 98% recyclable.

ALBERT SCHWEITZER KINDERDÖRFER UND FAMILIENWERKE

Albert-Schweitzer-Kinderdörfer non-profit organization

For every Classic Wall Calendar and Advent Calendar 100 % Cardboard, we donate a share of the proceeds to the Albert Schweitzer Children's Village.

Ritter SPORT exclusively sources certified sustainable cocoa.

DE-ÖKO-006

Certified organic seal

Products featuring the certified organic seal have been produced, processed, imported and traded in accordance with the European guidelines for organic farming.

FSC Quality

Our catalogue is printed in line with FSC quality standards. An FSC label on wood and wood products ensures that people and the environment are being treated fairly and responsibly.

OUR ADVENT CALENDARS ARE 100 % CLIMATE-NEUTRAL!

As an environmentally conscious company, sustainability is very important to us. Thus we decided to cooperate with ClimatePartner and to make our advent calendars climate-neutral. We compensate for all greenhouse gas emissions caused by the products we produce by investing in a climate protection project. Therefore, all advent calendar orders placed with us are climate-neutral and marked with the "climate-neutral" label. You can find more information on our climate neutrality and the positive effects of the supported project on the climate, the environment and society at **www.climatepartner.com/13255-1904-1001**.

We compensate 1,236,030 kg of CO₂, which corresponds to...

THE PRINCIPLE OF CLIMATE-NEUTRALITY

Companies, processes and products, whose CO_2 emissions are calculated and compensated for supporting internationallyrecognised climate protection projects are classified as climateneutral. Additionally, avoiding and reducing CO_2 emissions, as well as compensation for CO_2 emissions is another important step in the holistic approach to climate protection. Greenhouse gases such as CO_2 are distributed evenly in the atmosphere. Hence, the concentration of greenhouse gases is more or less equal all over the world. Thus, the impact on the greenhouse effect is the same, no matter where the greenhouse gas concentrations are, or where the emissions are caused or avoided. Because of this, emissions that cannot be avoided locally can be compensated for by climate protection projects at a different location.

92847 – Weihnachtsmann mit Laterne

92849 - Weihnachtsmond

92850 – Weihnachtsparade

92983 – Weihnachtsetikett

92899 - Retro Botschaft

92984 – Geschenke auf Holz

92995 – Rote Hirsche

92996 – Schneemann in Glaskugel

92997 – Roter Weihnachtsbaum

92998 – Weihnachtswald

92999 - Sternenvielfalt

GENERAL INFORMATION

We have put some basic information together for you. Please note that every inquiry naturally has to be dealt with individually as we could not hope to cover every possible case in writing here. Our customer advisers would be happy to advise you and answer any questions you may have by phone. To make sure the advice you get corresponds to your particular inquiry, we require your desired print subject.

Delivery times

A specified week of delivery refers to the week in which the goods leave the company and a specified delivery day refers to the day the goods leave the company.

Our delivery times depend on the approval of the printing copies and not on when printing copies were received. We cannot confirm a delivery time without an approval of the printing copies.

Delivery times may be longer in periods of very high demand (e.g. in the run up to Christmas) or during any closures at our suppliers.

Perishable foodstuffs

Foodstuffs cannot be exchanged. Please check the goods as soon as you receive them and send us any complaints within 24 hours. We cannot accept any complaints received after this period of time. Once the goods leave our premises, we no longer have any influence on our foodstuffs and thus cannot accept any responsibility or liability either in terms of quality or in terms of the food law.

In warm weather, it might be necessary to deliver some products by cold-storage lorry to guarantee the goods arrive in perfect condition (note: differnet freights costs).

Corrections

Nothing is printed until you have given us your approval in writing. Making changes to the proof you receive from us does not constitute an approval. You will receive a corrected proof to be checked and approved. Please make sure you check the proof we send you very carefully. If you are at all unsure, give us a call. We would be happy to help you. Your approval is a mandatory part of the order. It has unlimited validity and cannot be revoked. We cannot assume any responsibility for the prints you approve or for errors of any kind which may have been overseen.

If we are in possession of your data 1:1, the proof is created free of charge. We reserve the right to charge a flat rate for changes made to the proof starting with the third corrected proof.

You will be charged for any work carried out by us in preparation for your approval if you subsequently cancel your order.

Complaints

If you have any complaints, please get in touch with us immediately We require at least ten per cent of the total order as proof of the fault. Please send the goods back to us as proof in the original packaging. This also applies to any complaints you have about printing. Complaints about the taste and appearance of foodstuffs can only be accepted if you handled and stored the goods correctly.

Example: Foodstuffs must be stored in a dry place and be protected from changes in temperature (warm/cold).

If you have any questions, please do not hesitate to contact one of our customer advisers.

Damage during transport: All delivered goods, whether on pallets or in the form of parcels, must be checked immediately for any damage (correct securing, wrapping/boxes undamaged). The driver (freight/logistics company) must be made aware of any visible damage and should confirm this damage in writing on the delivery papers.

Please note down the exact details of the damage, including photos, and in-form us immediately. Claims concerning damage reported at a later date and/or damage not recorded on the delivery papers cannot be claimed retroactively!

Order quantities

For technical reasons, divergence of quantities up to ± 10% is possible. Depending on the category of product, our products are either counted or weighed before they are packed. This can result in different quantities in individual boxes. The final number is checked and logged by us. If there are any irregularities per packing unit, please check the final number.

Notes on packing

When ordering, please take our packing units into consideration. The specified freight costs are approximated, not binding, and cannot be determined precisely until the order has been completed.

Biscuits, cookies, and other baked articles can break during transport.

Colours

Depending on the material and product, colours may deviate.

In the case of multi-coloured printing, a colour-binding proof of the provided data is mandatory.

When using a transparent, coloured, or metallic base, colour reproduction can vary if a white background is not used. We would therefore recommend that you use a white background, if technically possible, which is charged as an additional print colour (not in digital printing). To avoid complaints about colour, please make sure you include a colour-binding proof.

Unchanged reprints can also demonstrate colour deviation. This is for technical reasons and cannot be avoided. Nuances of colour deviation will therefore not be recognised as a complaint.

QR CODE and barcode

Please note that we cannot guarantee that QR codes will be legible.

Further processing

Variations can occur during processing for technical reasons. This applies, for example, to press cuts and blanks of cardboard packaging. In the case of foil products, there can be a slight shift of the motif during packing. In the case of solid designs, cutting can only be controlled within a certain tolerance. It is therefore possible that colour transitions in the motif are displaced in the cutting area and thus visible as a fine stripe (of the other print colour) at the cutting end of the packing.

In the case of bags, the content text may be concealed in part by the sealed seam.

Tetrahedron packaging:

Due to the packaging, it could happen that the position of the printed image varies on the triangular advertising space.

<u>Sticky wrappers:</u> Slight blistering may occur and it could happen that the ends of the wrapper may not meet exactly.

Shelf life

The best before date specified can only be guaranteed if the product is stored correctly. In addition to taking the product-specific properties into consideration, please ensure you store the product in a dry, cool place away from sunlight. Avoid changes in temperature, particularly with products containing chocolate, as this can result in a white film developing on the chocolate.

Manufacturer's notification on products

In accordance with EU directive 178/2002 for the guarantee of food safety and in compliance with the requirements of the food law, we will be attaching a manufacturer's notification to our products/selling units. For most products, the end customer, dealer, or agency can decide whether he himself as the issuer should be specified on the product packaging or outer packaging or whether the manufacturer should be named. If we are not provided with a manufacturer's notification, we will use our manufacturer. If the end customer explicitly rejects all these specifications, the manufacturer must be released from all claims in writing.

We are obliged to advise you that manufacturer's data must comply with legal specifications. The data are not intended for any promotional purpose.

Declaration

Due to food law regulations in accordance to VO 1169/2001, the declaration must be in the official language of the country in which the goods are distributed. If declared in another language, we can not guarantee the marketability of the goods. The responsibility of marketability in this case passes to the customer.

Distribution list

If the products are to be sent to different shipping addresses, please send us the address data as an EXCEL file with one address component per column (e.g. company1/company2/street/postal code etc.). Just ask for our template. Bills of delivery must be provided in triplicate. Depending on the work involved, additional costs may be incurred.

IMPORTANT INFORMATION

Information on creating printing copies

If possible, match our provided imposition layout 1:1. Data editing costs will otherwise be incurred

- Line drawings should have an optimum resolution of 1.200 dpi or be vectorised. Continuous-tone illustrations should have a resolution of 300 dpi.
- When sending files by email, please make sure you use the appropriate program extension (e.g. .indd for InDesign, .ai for Adobe Illustrator, .psd for Photoshop).

Our programs:

- Adobe Illustrator CC
 Photoshop CC
- InDesign CC

Open data:

If your document includes any imported/embedded files (e.g. tif, eps, bmp, or jpeg files), please make sure you save these separately! Please change the fonts into character paths to avoid the loading of any other fonts. If this is not possible, send us the fonts (only Mac fonts).

- Please note the following when supplying data as a PDF: Your created data should correspond to our layout template, please do not change it.
- PDF compatible up to PDF/X-4 (Acrobat 1.6)
- No encrypted PDF files (password protection or the like)
- No coloured pattern cells/tile patterns No comments, form fields, or the like
- No transfer curves
- Leave layout sketches at "overprint" and you must leave it at our separate special colour with the name "Stand"

- Data carriers (if you want to send your data by post): Please write your address, file name, logo name, product name, and order number clearly on the data carrier (e.g. CD) and include a printout of the files.
- The printout should include the file name and the name of the printing colour(s) required, e.g. HKS, Pantone.

The fastest way to order: Just send your data, including the name of the motif, by email to your customer adviser. If the data exceeds 100 MB, we recommend you send us the data via FTP server. If you have any further questions on exchanging data, please do not hesitate to contact your customer adviser.

Printing information

Fine details, small fonts, and trademarks can smear or disappear. In the case of multi-coloured printing, a colour-binding proof of the provided data is mandatory.

Printing methods:

4-c digital printing: Paper/cardboard, boxes, foils, labels

4-c designs are available at attractive prices even with small quantities. Register differences cannot occur. The colours are always compiled from the 4-c process. Special colours in accordance with HKS or Pantone can only be approximated

Boxes: Applying a white background to the motif, as is usual with silver boxes in pad printing, is not possible. In these cases, transparent inks are not opaque and therefore often do not achieve the desired colour tone (can look dirty). Please also note that negatively recessed elements will appear in box colours in print. On the other hand, this can result in a very elegant effect thanks to the shining through e.g. of a shiny box. Slight streaking may be visible with extensive colour designs.

Due to the bled-off round surface structure of the product, there may be a slight distortion of the printed image.

Foils: Some parts of the sealed seams cannot be printed (see imposition layouts).

1-4-colour flexo: Foils

In full-surface printing, register differences are possible to an extent. A fine unprinted line over the foil is a result of the block ends meeting. Colour rubbing on the sealed seam is also possible in full-surface printing. Designs with extensive ink coverage and metallic colours should be varnished to protect them from colour rubbing (counts as an additional print colour)

In printing technology, breaks in the screen cannot be avoided. The tolerances for this are: Flexo printing 3%

Due to a very coarse screen (30 l/cm), we would recommend that sweet wrappers and flowpack packaging are printed entirely without a screen.

Sweets: In full-surface printing, a white edge (each of 1 mm) remains on the side at the end of the wrapper ends. Due to the block ends meeting, a fine white stripe runs across the width of the paper.

Note: Halftone motifs only after a printability check. A colour-binding proof of the data provided is required with multi-colour screen motifs.

1–4-colour offset: Paper, cardboard An attractive price for larger print runs. Printing of special colours in acc. with HKS and Pantone is possible. Fluorescent inks cannot be used.

1-4-colour pad: Boxes, dispensers

Register differences are possible to an extent. The double printing of individual colours may be necessary for full-surface motifs (counts as an additional print colour in each case). Slight scratches and unevenness may appear due to the material

In printing technology, breaks in the screen cannot be avoided. The tolerances for this are:

- Pad printing 15 %

Laser engraving: No halftone motifs possible.

Top-quality customising is possible even with small quantities. Laser engraving involves the varnish being removed, exposing the shiny surface. With full-surface lasered motifs, the cast of the box material becomes visible. Slight scratches and unevenness may appear due to the material.

In the case of coloured boxes, a coloured shadow can appear in the engraved picture

Embossing: No halftone motifs possible. Elegant embossing (high-relief embossing). Extremely elaborate designs are not always possible.

Sleeve: A slight distortion is possible on rounded parts.

EASTER IS ON APRIL 12TH 2020!
